

TOPAZ LIGHTING & ELECTRIC COMPACT FLUORESCENT PRODUCTS

Topaz Lighting has added many new CFL products to meet the demands of the changing lighting market.

California's Titles 20 & 24, and the Federal Energy Act of 2007 have mandated that some of our much loved incandescent bulbs are no longer manufactured.

Topaz offers design friendly alternatives in compact fluorescent, with a CRI of 82 and above, life hours ranging from 8000 to 12000 hours, a range of color temperatures and wattages with Energy Star Certification.

Pictured above are the CF/R20 dimmable lamp, the Topaz equal to the "super" minispiral, and the GU24 based spiral lamp.

Topaz dimmable CFL's are available as minispirals; PAR30 and Par38; R20, 30 and R40.

The superior minispiral has a low profile T2 tube to fit the smallest replacement applications and is available from 7 watt all the way up to 23 watt.

GU24 based lamps offer a way to comply with Title 24 requirements; the lamps are self ballasted with a twist and lock base to prevent replacement with a non-compliant light source. The sockets for retrofit are also available.

Topaz Lighting and Electric products are available through distributors. Topaz has 5 locations and 17 stocking representatives throughout the USA. For more information call 888-551-2852, fax 888-690-2852, web: www-topaz-usa.com
